Please do not let the Atlantic Coast Pipeline come through North Carolina! I keep seeing ads on TV for the "positive" things bringing natural gas into our state and into the communities outlined to go through them will bring. These things are misguided at best. 1. Jobs - for who? Not the people in those communities, at least not the long term kind. Only the company people will have those jobs because they won't require training. 2. Natural gas for our communities. Do these people not see that the pipeline goes THROUGH these communities to somewhere else? There are no feeder lines to assist anyone in NC.

The environmental impact on our state can not even be calculated. "Removing the fish in the rivers and stream" to build under those waterways and then put the fish back as though nothing has been changed. Really? What kind of magic trick is that?

There are so many opportunities for people in the solar and wind business that the ACP is laughable. And solar and wind is sustainable, unlike natural gas that has a 20 shelf life.

Please do not let the ACP come through North Caroline. Support sustainable energy and jobs.
